

InteractiveResumeBuilder

Project Overview

InteractiveResumeBuilder is a web-based application that allows users to create, edit, and customize their resumes interactively using HTML, CSS, and JavaScript.

Directory Structure

InteractiveResumeBuilder/

|— index.html

|— script.js

|— style.css

Files Description

- **index.html** - The main HTML file containing the structure of the resume builder.
- **script.js** - JavaScript file for handling user inputs, generating resumes dynamically, and adding interactive functionalities.
- **style.css** - CSS file for styling the resume builder interface.

How to Use

1. **Open index.html in a web browser.**
2. **Enter resume details such as name, experience, education, and skills.**
3. **Preview and download the generated resume.**

Technologies Used

- **HTML**
- **CSS**

- **JavaScript**

Future Enhancements

- **Add templates for different resume styles.**
- **Implement export functionality to PDF.**
- **Enable cloud storage for saving user data.**
