

# 1PersonalPortfolioWebsite

## Project Overview

**1PersonalPortfolio Website** is a basic personal portfolio website that serves as an online presence for an individual, showcasing their skills, projects, and contact details.

## Directory Structure

### 1PersonalPortfolioWebsite/

|— index.html

|— styles.css

## Files Description

- **index.html** - The main HTML file containing the portfolio content.
- **styles.css** - The CSS file for styling the portfolio.

## How to Use

1. Open index.html in a web browser to view the portfolio.
2. Modify index.html and styles.css to customize the content and appearance.

## Technologies Used

- **HTML , CSS**

## Future Enhancements

- **Add JavaScript** for interactive elements.
- **Implement responsive design** for better mobile support.
- **Integrate a contact form** with backend support.
