

InteractiveRecipeCard

Project Overview

Interactive Recipe Card is a simple interactive web application designed to display and manage recipes dynamically using **HTML, CSS, and JavaScript**.

Directory Structure

InteractiveRecipeCard/

|— **index.html**

|— **script.js**

|— **style.css**

Files Description

- **index.html** - The main HTML file containing the structure of the recipe card.
- **script.js** - JavaScript file for interactive elements such as toggling ingredients, steps, and user interactions.
- **style.css** - CSS file for styling the recipe card and improving user experience.

How to Use

1. **Open index.html in a web browser.**
2. **View the recipe details, including ingredients and instructions.**
3. **Use interactive elements to reveal/hide recipe details.**

Technologies Used

- **HTML**
- **CSS**

- **JavaScript**

Future Enhancements

- **Add functionality to save and edit recipes.**
- **Implement a search feature for multiple recipes.**
- **Enhance UI with modern styling frameworks.**
