# Task1InternshipsCard

Project Overview

Task1InternshipsCard is a simple static website that showcases different internship opportunities in various domains. Each internship domain has a dedicated HTML page providing information about that specific field.

Directory Structure

Task1InternshipsCard/

├── app-development.html

├── cloud-computing.html

├── cyber-security.html

├── data-science.html

├── index.html

├── java-programming.html

├── machine-learning.html

├── python-programming.html

├── style.css

└── web-development.html

Files Description

- **index.html** - The main homepage listing all available internships.

- **app-development.html** - Internship details for App Development.

- **cloud-computing.html** - Internship details for Cloud Computing.

- **cyber-security.html** - Internship details for Cyber Security.

- **data-science.html** - Internship details for Data Science.

- **java-programming.html** - Internship details for Java Programming.

- **machine-learning.html** - Internship details for Machine Learning.

- **python-programming.html** - Internship details for Python Programming.

- **web-development.html** - Internship details for Web Development.

- **style.css** - Contains the styling for the website.

How to Use

1. Open **index.html** in a web browser.

2. Click on any internship category to navigate to its respective page.

Technologies Used

- HTML

- CSS

Future Enhancements

- Add JavaScript for interactive elements.

- Enhance UI with modern styling frameworks.

- Include backend support for internship applications.
